## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 16, drawn to a method of producing fillable plastic bodies, classified in class 264, subclass 513.
  - II. Claim 17, drawn to a method of filling plastic bodies, classified in class 264, subclass 523.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as patentably distinct combinations. Group I requires injecting two thermoplastics into a mold cavity which is not required by Group II while group II requires expanded a tube preform and cutting open the end which is not required by Group I. Since the limitations of Group I are not found in Group II and vice versa, this is evidence that the particular characteristics of the subcombinations are not the sole basis for patentability . Patentability is based on different features/limitations in the combination of the independent claims. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Don Bulson on 9/13/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
